

防火墙 (新) yum install net-tools* -y

vi /opt/lsb

port1=\$(catstat -n | tr '\n' ' ' | awk 'NR>2 {print \$4}' | awk

-F '{print \$NF}' | uniq)

for i in \$(port1

do

firewall-cmd --per --add-port=\$i/tcp;

done

port2=\$(catstat -n | tr '\n' ' ' | awk 'NR>2 {print \$4}' | awk

-F '{print \$NF}' | uniq)

for i in \$(port2

do

firewall-cmd --per --add-port=\$i/tcp;

done

systemctl restart firewalld

sh /opt/lsb

firewall-cmd --reload

firewall-cmd --list-all

查看 firewall-cmd 指令的其它 man firewall-cmd

14

group 记得 stop httpd

12: cd /usr/lib/systemd/system

cp -p httpd.service /etc/systemd/system/httpd-limit.

vi httpd-limit.service (原文件修改) 蓝文件红文件为第2次修改文件

[Unit]

Description=The Apache HTTP Server

After=network.target

[Service]

ExecStart=/usr/sbin/httpd \$OPTIONS -DFOREGROUND

Restart=always

MemoryMax=512M

CPUsQuota=80%

CPUsAffinity=1

[Install]

WantedBy=multi-user.target

systemctl daemon-reload (1)

systemctl start httpd-limit

ps -o pid,ppid,comm -C httpd

systemctl stop httpd-limit

文件加上红色部分后 再写一次且最后一条命令下全是1 没有0
